

# ALWIN BENNY

+91 6238990715 alwinpeterbenny@gmail.com alwinbenny alwinbenny

## Technical Skills

**Programming Languages & Databases:** Python, SQL, C, Java, JavaScript, React.js

**Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, TensorFlow

**Data Visualization Tools:** Matplotlib, Seaborn

**Machine Learning & AI:** Machine Learning, Deep Learning, Neural Networks, Model Evaluation, Data Preprocessing, Data Visualization

**Web Technologies:** MERN Stack (MongoDB, Express.js, React.js, Node.js)

**Core CS Fundamentals:** Data Structures and Algorithms (DSA), Operating Systems, DBMS, Object-Oriented Programming (OOP), System Design, Problem Solving, Analytical Thinking

## Experience

### AI/ML Intern

1 Month

*Intrnforte*

- Completed an intensive internship focused on Artificial Intelligence and Machine Learning fundamentals.
- Gained hands-on experience in data preprocessing, basic model building, and model evaluation using Python.
- Applied AI/ML concepts through practical tasks and mini-projects to strengthen analytical and problem-solving skills.

### Python Programming Training

2 Months

*LinkedIn Learning*

- Completed a structured training program covering Python fundamentals, data structures, file handling, and basic scripting.
- Strengthened problem-solving skills through hands-on exercises and real-world examples.

### Web Developer

2023

*College of Engineering Poonjar*

- Developed a full-stack **MERN-based College Alumni Website** to streamline alumni engagement and data management.
- Designed and implemented **role-based access control** for users and administrators, ensuring secure authentication.
- Improved institutional efficiency and transparency by centralizing alumni data and communication workflows.

## Projects

### Expense Tracker Application | Python, CLI, JSON, CSV

Jan 2026 – Feb 2026

- Developed a menu-driven command-line application to efficiently track and manage daily expenses.
- Implemented features to add, edit, delete, and view expenses with category-wise and monthly summaries.
- Used **JSON** for persistent data storage and enabled **CSV export** for reporting and analysis.
- Designed the application using a modular architecture with proper documentation.

### Customer Churn Prediction: ML-Based Retention Model | Python, Streamlit, Scikit-learn

Jul 2025 – Sep 2025

- Developed a machine learning model to predict customer churn with **80% accuracy** using Logistic Regression, Random Forest, and SVM.
- Analyzed **7,000+ telecom customer records** to identify churn patterns and improve retention strategies.
- Built a Streamlit-based web application for real-time predictions and visualization dashboards.
- Delivered actionable insights to identify high-risk customer segments for early intervention.

### Breast Cancer Detection: CNN-Based Diagnostic Model | Python, TensorFlow

Jun 2025 – Jul 2025

- Built a CNN-based deep learning model classifying **2,000+ medical images** into benign or malignant with **92% accuracy**.
- Optimized preprocessing and augmentation pipelines, reducing training time by **20%**.
- Generated performance visualizations to improve model interpretability.

### Customer Insurance Purchase Prediction | Python, Scikit-learn, Pandas, NumPy, Matplotlib

Jun 2025 – Jul 2025

- Developed an AI-based classification system to predict insurance purchase behavior using demographic features.
- Implemented and compared Logistic Regression, KNN, SVM, Decision Tree, and Random Forest models.
- Performed data preprocessing, feature scaling, label encoding, and train-test splitting.
- Achieved **91% accuracy** using Random Forest with strong generalization and reduced overfitting.
- Visualized customer trends to derive business insights for insurance targeting strategies.

College Alumni Website (CE Poonjar) | *MySQL, Express.js, React.js, Node.js (MERN)*

Oct 2024 – Jun 2025

- Designed and developed a structured alumni engagement and networking platform.
- Implemented Admin and Alumni modules with jobs, events, forums, galleries, and email notifications.
- Centralized alumni data using role-based access to improve system reliability and efficiency.

Education

---

Kerala Technological University

B.Tech in Computer Science

Oct 2022 – Jun 2026

Kottayam, Kerala
